Local Fishing News!

As part of a 5 year joint project between the Environment Agency and The Earl of Harrington's Angling Club (<https://www.theearlofharringtonsac.co.uk/>), a further batch of chub and barbel fry have been introduced into the River Derwent below Darley Weir. This action is intended to partially offset the damage done to fish recruitment by the invasive signal crayfish.

A number of crayfish traps have been found locally by the angling club's river bailiffs and have been removed and/or reported to the Environment Agency. The setting of these traps is illegal, can lead to court appearances and hefty fines and is banned because the traps can spread disease, don't distinguish between the invasive signal crayfish and the at-risk native white-claw cray fish and pose a risk to other wildlife and dogs.

Junior Anglers

There has been a significant increase in the junior memberships of Derby's angling clubs, possibly as parents/carers push for kids to be "offscreen and outside". The Derby Young Anglers' Project events, including those at nearby Woodrow's Pond opposite Derby Rugby Club, have all been oversubscribed. To be on the distribution list for information on future events for beginner young anglers please email your interest to
